The Bass Valley News is a FREE publication provided for you by the Bass Valley Community Centre.

Grantville Before

Foreshore After

But What To Do?

Dr Tim Ealey inspects progress at the Grantville Foreshore of the sand bagging operation. The question everyone is asking though, "Can Tim take on Mother Nature and win?" Already a major problem has occurred with work being halted due to the excavator's combined weight in carrying the two-ton sand bags offshore to the desired location. Initial attempts have seen the excavator sink to dangerous levels through the surface into an unanticipated, muddy sludge below. Inset is Bass Valley News assistant, Sasha, (with Tim) getting down and dirty on command to highlight the problem. More details on page 3.
